Dear Judith

I refer to our ongoing discussions regarding the ground lighting at Collingwood Park, and confirm that the committee and members are fully supportive of the proposed upgrade.

As you know we have been working towards this for several years' now and the club is very excited about the prospect of this major improvement to our facilities.

This key improvement will allow the club to once again promote football through night games at the beginning and end of the regular season, and we will be proposing a night final as soon as possible. The improvement will also enhance the ground usage for other community clubs such as Touch Rugby, cricket and anyone else looking to utilize our facilities.

Yours sincerely

LGA comments (Required):

This project is part of a larger City vision to transform underutilised and dilapidated sporting grounds into the region's premier sports and recreational precincts.

The replacement of the old towers and sports lighting has been identified and raised by the North Albany Football Club for a number of years.

A 2010 Feasibility Study for Infrastructure Improvements at the North Albany Football and Sporting Club (NSFAC) identified the improving the oval lighting as the second highest priority after improvements to reticulation and drainage (completed).

The towers are wooden structures and are no longer compliant with modern standards. A recent lighting assessment identified that the lux level was well below the standards required for training and matches. The proposed lighting upgrade will cater for district training needs of soccer, AFL, cricket and touch rugby.

Collingwood Park along with Centennial Park Sporting Precinct are key city assets that form part of the hierarchical sporting infrastructure provision for the City of Albany. Collingwood Park provides services for district level amateur sporting competitions whilst Centennial Park Sporting Precinct meets the regional provision requirements. The feasibility study identified improving the lighting to a grade that would support improved training and allow for night matches to provide greater fixture flexibility.

It is expected that the project will contribute to the required infrastructure needs of Albany and the wider Lower Great Southern region for the next 15 years, increasing social capital, liveability, health, physical activity and social inclusion across the region.
